TRAINING GOALS

What problems are you having with your dog?

What do you hope to accomplish with training?

COMPLETION OF TRAINING

Once we get near the end of your dog's training time, we will evaluate all behaviors. If we feel we need more time to accomplish our training goals, we will ask to keep your dog for a few more days. Pick-up will be arranged at a convenient time for both of us. We will spend about 1 1/2 hours showing you what your dog has learned, and teaching you how to continue practicing..

After this training period, your dog will have a good training foundation to build on. It is crucial that you continue to practice with the remote training collar once your dog goes home. The more you practice initially, the better your dog will become with and without the training collar.
